

## Webinar Announcement

### **Energy Low-Emission Development Strategies: A Regional Overview of Africa and Experiences from Cape Verde and Kenya**

**22 January 2015 9:00 AM EST**

[Check your local time.](#)  
[Reserve your seat now.](#)

The Africa LEDSPartnership (AfLP) and the Energy Working Group (EWG) of the Low-Emission Development Strategies Global Partnership (LEDS-GP) are co-hosting a webinar on sustainable energy progress in Africa. The webinar offers both an overview of recent developments in clean energy policies, programs, and targets across the region and in-depth case studies on Kenya's and Cape Verde's experiences in creating innovative, climate-compatible energy development approaches. Presenters will outline the targets, policy objectives and implementation programs of these two leading African countries, providing insights into challenges encountered and how they were overcome.

- **Introduction & Moderation**  
Alexander Ochs, Worldwatch Institute/EWG Chair
- **Regional Overview: Low Emission Energy Development in Africa**  
John Yeboah, ECOWAS Centre for Renewable Energy and Energy Efficiency/EWG co-Chair
- **Learning from Cape Verde's Renewable Energy Plan**  
Anildo Costa, Consultant to the Government of Cape Verde
- **Learning from Kenya's Renewable Energy Plan**  
Esther Wang'ombe, Government of Kenya
- **Q&A**

This webinar is the final of a three-part series on regional experiences in low-emissions energy program and policy design. Please visit the [LEDS-GP](#) for recordings of the presentations on low emission energy development in Latin America and the Caribbean and Asia.

## About LEADS Global Partnership

The Low-Emission Development Strategies (LEADS) Global Partnership (GP) was founded in 2011 to enhance coordination, information exchange, and cooperation among countries and international programs working to advance low-emissions, climate-resilient growth. The LEADS GP currently brings together LEADS leaders and practitioners from more than 120 countries and international institutions through innovative peer learning and collaboration forums and networks. For the full list of participants and more information on partnership activities, see [ledsgp.org](http://ledsgp.org).

The **Africa LEADS Partnership** (AfLP) is a regional network comprising individuals and organizations from the public, private, and non-governmental sectors active in designing, promoting, and implementing LEADS in Africa. The Partnership aims to advance the development of national-level and country-led strategic plans to promote economic growth while reducing greenhouse gas emissions and strengthening resilience to the impacts of climate change in the Africa region.

The **Energy Working Group** (EWG) is an energy sector network of country governments, multilateral institutions, individuals, and non-governmental organizations involved in activities to support the development and implementation of low-emissions energy strategies. The EWG seeks to facilitate international coordination and collaboration among countries in successfully developing low-emissions, climate-resilient energy strategies through an exchange of information, best practices, and advisory services.
